## TECHNICAL SKILLS

---

**Expertise:** JavaScript, ES6, React.js, Firebase, Tailwind, Html5, Css5

**Comfortable:** Next.js, Rest API, Chrome Dev Tool, Bootstrap, Mongoose

**Familiar:** Node.js, Express.js, MongoDB, JWT, Axios, React Query

**Tools:** Git & GitHub, npm, VS Code, Netlify, Vercel

## PROJECTS

---

### Orfarm-Grocery

[Live / Client](#)

**Technology** – Next.js, Mongoose, NextAuth, Redux, Tailwind

Explore various fresh vegetables and groceries, from leafy greens to premium essentials. With a user-friendly interface, secure checkout, and timely delivery, I make shopping for your daily needs effortless and convenient. I faced challenges with mongoose schemas, chart.js, next-auth, Stripe integration, and vercel deployment. I resolved these by researching solutions online and learned redux during the process.

- **User-Friendly Interface:** Designed with a sleek and user-friendly interface, the app ensures a seamless shopping experience, allowing users to easily browse, select, and purchase products with minimal effort.
- **Filtering:** The app features filters for location, category, price, and product condition (new/old), along with a search option for easy and personalized shopping.

### Best-Deals

[Live / Client / Server](#)

**Technology** - React, Node, Express, MongoDB, JWT, Firebase, Tailwind

The app provides a seamless shopping experience with diverse products, a user-friendly interface, secure transactions, and multiple vendors. I improved my GitHub collaboration skills during this project and solved challenges like live chat, reviews, and HTML2PDF by exploring online resources.

- **User-Friendly Interface:** The app has a visually appealing and intuitive interface, ensuring easy navigation and quick access to all sections for a smooth shopping experience.
- **Filtering:** The app includes filtering options, allowing users to search by product category and price range for a more personalized and efficient shopping experience.

### Green-Harvest

[Live / Client](#)

**Technology** – Next.js, Typescript, Tailwind

GreenHarvest is an online platform for buying and selling fresh farm products. It offers a responsive design, secure authentication, and a user-friendly experience to connect farmers and buyers effectively.

- **Responsive Design and Accessibility:** This website is responsive for mobile, laptop, and desktop only.

## EDUCATION & COURSES

---

### Pubail Adorsho College

2022 – 2023

HSC in Accounting (3.00)

### Programming Hero

Complete Web Development

[Certificate](#)
